Yog P. Patel

211 Charlton St Nahunta, GA 31553| 912-286-7927| ypatel347@gatech.edu| U.S. Citizen

Objective

Ambitious Georgia Tech engineering student and proven leader combining direct programming (Python, VEXcode) with manufacturing and systems experience (G-Code CNC, digital system migration). Seeking an engineering internship starting Summer 2027 that provides hands-on technical experience and structured mentorship, where I can apply analytical problem-solving and structured coordination to accelerate team deliverables and optimize operational workflows.

Education

Brantley County High School| Nahunta, GA *August 2022 – May 2026*
Transfer with 27 Credit Hours, GPA 4.00

Georgia Institute of Technology| Atlanta, GA *August 2026 –Present*
Bachelor of Science in Electrical Engineering

Skills

Programming: Python, VEXcode/ROBOTC (VEX Robotics), G-Code (CNC Milling)
Platforms: Windows, macOS
Software: Blender, Microsoft Office 365, Google Workspace, Canva
Professional Organizations: Georgia Tech Ramblin' Rocketry Club
Communication: Standard operating procedures, writing project pitches, presentations (large and small audiences)
Languages: English (fluent), Gujarati (intermediate), Hindi (beginner)

Experience

Hospice Satilla| Waycross, GA *August 2024 – Current*
Volunteer

- Assist in organizing community events and outreach efforts, engaging with 200+ participants and raising vital awareness.
- Mobilized resources and shaped shift communication for a core team of 10+ volunteers during fast-paced campaigns.

Coastal Pines Technical College | Waycross, GA *June 2024 – July 2024*
Intern

- Modernized institutional hardware by executing critical system updates and software patches across campus workstations, ensuring compliance with IT security protocols.
- Completed 40+ hours of advanced employability training in project management methodologies, applying these frameworks to execute campus hardware deployments without direct supervision.

Golden Isle Souvenirs| Brunswick, GA *March 2024 – August 2026*
Convenience Store Associate

- Managed inventory control for a high-volume location with 1,500+ SKUs, auditing product displays and restocking $10,000+ merchandise weekly to maintain peak sales floor appeal.
- Facilitated the store-wide transition to a new digital POS and inventory system, migrating data for over 500 product categories and training two team members on new workflows to ensure zero operational downtime.

Projects

Automated Fruit Ripeness System *Fall 2026*

- Engineered and programmed a low-cost optical sensing device utilizing an Arduino Mega microcontroller and ISL29125 RGB color sensor in C++ to objectively quantify fruit surface reflectance and evaluate ripeness.
- Designed a custom 3D-printed enclosure and cylindrical light shroud in Autodesk Fusion 360 to eliminate ambient light.

Leadership

BETA Club (High school) | President *August 2025 – May 2026*

- Directed strategic vision and executive meetings for a chapter of 200+ student members, aligning member efforts to hit milestones.
- Orchestrated 4 major service initiatives, aligning member contributions to generate 3,500+ collective hours of high-impact community support.
